

Solution
Assignment # 1
Human Computer Interfacing

Using VB.NET control design the following layout:

In addition to the visible controls, add an OpenFileDialog Control and name it as openFD

To the ShowSummary Button, you may add the following code which is quite self-explanatory.

```
Dim summary As String
summary = "First name " & txtBoxFirstName.Text & vbNewLine
summary = summary & "Lastname " & txtBoxLastName.Text & vbNewLine
summary = summary & "ID " & txtBoxID.Text & vbNewLine
summary = summary & "Country of Birth " & comboCountries.Text &
vbNewLine

If radioMale.Checked = True Then
    summary = summary & "Gender:Male " & vbNewLine
Else
    summary = summary & "Gender:Female " & vbNewLine
End If
```

```
summary = summary & "Hobbies: "  
  
If checkSports.CheckState = CheckState.Checked  
    summary = summary & "Sports" & vbNewLine  
End If  
  
If checkReading.CheckState = CheckState.Checked  
    summary = summary & "Reading" & vbNewLine  
End If  
  
If checkTravel.CheckState = CheckState.Checked  
    summary = summary & "Travel" & vbNewLine  
End If  
  
summary = summary & "Data of Birth " & calendarBirth.SelectionStart  
MessageBox.Show(summary)
```
