

Lab # 5: SQL: Joins

Subject: Database Systems

Course: BESE15 B

Date: 19th October, 10

TASK:

1. Write a query to display the name, department number, and department name for all employees.
2. Create a unique listing of all jobs that are in department 30. Include the location of department 30 in the output.
3. Write a query to display the employee name, department name, and location of all employees who earn a commission.
4. Display the employee name and department name for all employees who have an A in their name.
5. Write a query to display the name, job, department number, and department name for all employees who work in DALLAS.
6. Display the employee name and employee number along with their manager's name and manager number. Label the columns Employee, Emp#, Manager, and Mgr#, respectively.
7. Modify Q 6 to display all employees including King, who has no manager.
8. Create a query that will display the name, job, department name, salary, and grade for all employees.
