Lab # 6: SQL: Sub Queries

Subject: **Database Systems**

Course: **BESE15 B**

Date: **26th October, 10**

TASK:

1. Write a query to display the employee name and hire date for all employees in the same department as Blake. Exclude Blake.
2. Create a query to display the employee number and name for all employees who earn more than the average salary. Sort the results in descending order of salary.
3. Write a query that will display the employee number and name for all employees who work in a department with any employee whose name contains a T.
4. Display the employee name, department number, and job title for all employees whose department location is Dallas.
5. Display the employee name and salary of all employees who report to King.
6. Display the department number, name, and job for all employees in the Sales department.
7. Display the employee number, name, and salary for all employees who earn more than the average salary and who work in a department with any employee with a T in their name.
